Around System of Block Le Square Wardens Set Here

Gov. Thomas E. Dewey of New York, twice defeated candidate for president, last Saturday tried to do it the easy way and appointed himself dictator. Among his suggestions was the one that he be "empowered" to confiscate communication systems, newspapers, public utilities, and transportation facilities.

But what bothers us the most is the fact that hardly any newspapers or radio stations rose up in "righteous indignation" over the proposals. * * *

BELATED-PAT-ON-THE- Madre? BACK-DEPARTMENT: As always when praise is given for a job well done, someone is overlooked. Last week, several hard-working float volunteers were missed when it came to tipping the editorial hat. The "someones" were City Councilman Henry Korsmeier, Former Mayor, William Schiltz, Elsa Seifert, and Margaret Ascher.

Funny thing about Henry Korsmeier's name being omitted was that his wife had been dubious about his whereabouts Sunday afternoon and evening. We understand she questioned his tale of working on the float and checked the NEWS to see if his name was among the workers. Yes, he was there, Mrs. Korsmeier.

At least one reader thinks putting the Rose Parade float on display next to the P. E. is a good idea.

"During that time, anyway, the police can't park in their usual spot and trap unsuspecting motorists," she says.

The janitor from the Bank of Sierra Madre cleaned up the PE station this week.It should be the city's turn next week. After all, the structure now belongs to Sierra Madre.

MEMO TO MRS. M. R. WRIGHT: Temperature readings for Sunday, Monday and Tuesday are missing from our "weather" report this week. And for good reason. A "prankster" stole the thermometer magnet, and box from the city water grounds Saturday.

Residents could save themselves-not to metion us-a lot of trouble if they used the Sierra Madre Civic Directory to find out the bus schedule, instead of asking the NEWS

A complete time table is listed on Page 27 of the Directory, published recently by Chamber of Commerce.

The block warden system was set up for Sierra Madre last week, with 150 wardens appointed at a meeting of the Civil

call for the dividing up of Si-

erra Madre into 10 areas-cor-

P-TA to Pose Question of **Public Health**

What public health services of the San Gabriel Valley are available to children of Sierra

This often-discussed question will be answered at the next meeting of the Sierra Madre Parent-Teacher Association, scheduled for next Thursday, Jan. 18, at 2:45 p. m. in the school cafeteria.

Miss Olga Bloesch, supervising public health nurse for the city of Monrovia, will present information to what facilities are, and what are not, available to local children. All phases of health services and clinics-including mentalwill be discussed, according to Mrs. Stanley Coutant, P-TA

publicity chairman. Local problems concerning health will be outlined by Mrs. Hortense Wells, City School nurse, followed by a question and answer period.

Miss Bloesch attended the University of California, UCLA, and Washington University. She was in private practice for several years and has been in public health service since 1939. Before going to Monrovia, she was associated with health services in Torrance.

Fourth-grade teachers and mothers will be hostesses for the afternoon P-TA meeting.

Sister Noel At Conference In Illinois

Sister Noel, C.S.M., principal of Ascension Parish Day School, is attending the National Episcopal Parish Day School Conference in Illinois this week.

The conference, which opened Tuesday, Jan. 9, is being held at MacLaren Foundation in Syracuse, Illinois.

Among the featured speakers scheduled for the four-day session are Dr. Bernard Iddings Bell, consultant on religious education at the University of Chicago, and Dora Chapin of Cambridge University.

Petition Seeks End of Traffic Snarl in Alley the City Council Tuesday night.

A petition asking one-way traffic and parking on only one side of the alley north of the business district was submitted to

The petition, signed by 10 local business owners, was circulated by R. C. Lewis, president of the Bank of Sierra Madre.

Frequently, there is a "bad tie up of traffic" on the alley, particularly on that portion running east of Windsor Lane, it was pointed out in the petition. The alley parallels Sierra Madre boule vard, turns north, becomes Montecito Court, and ends at Montecito.

"This condition is not good for every day use and would be disastrous in the event of fire," it stated.

Businesses signing the petition were Howard's Furniture, Pollock's Market, Rasmussen Appliance, Ralph's Family Shoe Store, Arnold's Hardware, Sierra Madre NEWS, Sierra Madre Hardware, and Richley of California.

On motion of Councilman Noren Eaton, the petition was referred to Chief of Police Gordon G. McMillan with instructions to also consider Windsor Lane for the same action.

Pupil 'Invasion' **Continues Here**

Five more pupils enrolled at City School this week to boost the post-holiday "invasion" to 20 new students.

Last week, 15 pupils enrolled at City School as classes reconvened after the Christmas vacation. School officials had expressed "amazement" that so many would change schools in the middle of a semester.

This week, they were still scratching their heads.

Superintendent Charles Skutt explained, however, that families frequently like to do their moving during vacation times, particularly when their children are in the lower grades.

ball park.

And the City Council is expected to receive cost estimates for engineering the reconstruction of Kersting Court and Sierra Madre boulevard, from Baldwin to Lima, at an adjourned meeting Saturday

At the regular meeting Tuesday night, Councilmen voted to proceed with work on Baldwin (from Sierra Madre boulevard to Orange Grove, and from Montecito to Highland). Contractor for the job is Warren Southwest Company.

With the go-ahead signal, the Council put into action the project that had been delayed at the request of merchants until after the Christmas shop-

YEAR' FOR POST OFFICE

Total Sierra Madre postal receipts for the year 1950 increased 21.6 per cent over those for 1949, Postmaster Eddie D. Robertson As the new year started, Mr. Robertson sat down, looked over

\$75,438.76. A gain of 45.6 per cent was

Mr. Robertson said the number of parcel post packages increased "at least 25 per cent" over the number in 1949.

against \$27,487.83 for '49.

Asked why there was not a larger proportional increase over the holiday mailing of a year ago, Mr. Robertson countered with:

"Ask the big shippers of Sierra Madre why they didn't

Votes Mandate

An enthusiastic mandate for a recreation program in Sierra Madre was voted by the Kiwanis Club Tuesday.

The club will formally present its recommendations at next meeting of the Coordinating Council. In December, the Council had invited its member organizations to suggest what is needed in Sierra Madre by way of recreation. Kiwanians Tuesday voted approval of a four-point program, including the hiring of a fullor part-time paid recreation director and the modernization and extension of recreational

Among the new facilities

Dr. Allan Burgess, boys and girls chairman of Kiwanis, will present the club's suggestions to the Coordinating Council.

Lions District Governor to Visit Club

Special guest at the regular meeting of the Sierra Madre Lions Club this evening will be Lyman Theal, district governor of Lions International. During his official visit to the Sierra Madre club, Mr.

LYMAN THEAL . . . district governor

Theal will extend greetings to local members from the district.

Col. Henry A. Finch, U. S. A. retired, is speaker of the evening and will discuss the United Nations. He will be speaking in connection with the UN program of the local Lions

Program chairman this evening is Carl Peterson, according to President Sterling T. Ripple. The meeting begins at 7:30 at the Woman's Clubhouse.

CLUB OFFERS TO LANDSCAPE PE STATION

the city for landscape work surrounding the PE Depot.

At Tuesday night's meeting of the City Council, M. H. Owens, 330 Ramona, said the club is "anxious and willing" to do the planting at the station "if and when the time is appropriate."

Mayor William A. Kinney thanked Mr. Owen and the Garden Club for their offer. Deed to the property has not yet been formally accepted by

Dr. R. Haas To Address **Local Parents**

"Your Child in a Changing World," is the subject Tuesday night, Jan. 16, when the second in a new series of discussion-lectures is presented by the Sierra Madre Community Nursery School Association.

Speaker of the evening will be Dr. Robert B. Haas, director of education extension at UCLA. Following the lecture, to which parents of both school and pre-school children are invited. Dr. Haas will answer questions from the floor.

Dr. Haas is being brought to Sierra Madre through the Pasadena City College adult education program and is the second of three "definitely promised" speakers under the sponsorship of the local nursery school group.

If these meetings are well attended, says Association President Harold Bartel, a topflight speaker, not usually available for small groups, can be secured for each of the monthly parent-education programs held at the nursery

For that reason, and because Dr. Haas is a prominent educator, nursery school officials have invited P-TA members. parochial s'chool parents groups, and all other parents of the city to attend Tuesday night's talk. Mr. Bartel said.

The program, beginning at 8 o'clock, will be held at the nursery school building, 701 E. Sierra Madre boulevard.

Chamber Members Get Board Ballots

Ballots to elect seven new directors for the Chamber of Commerce were mailed members Tuesday, Chamber Secretary Edna Hewitt announced this week.

The ballots, listing 14 candidates for the 7 vacant chairs on the board, must be returned to the Chamber office by next Wednesday, Jan. 17.

After a canvass of the vote, the new directors will take office at the Dec. 22 meeting.

City Hires Acting Public Works Chief

Glen B. Watson was hired Tuesday night as Sierra Madre's director of public works and acting street, water, and park superintendent.

Mr. Watson, who resides in the Hastings Ranch, comes out of retirement to take the Sierra Madre job. For 26 years, he served Arcadia as city engineer, street superintendent, and building inspector.

The City Council employed Mr. Watson on a basis of 20 hours a week, at \$250 a month, with an equivalent rate of pay for additional time on the job.

New Civil Defense Law Services of the Sierra Madre Garden Club are available to the city for landscape work

ORDINANCE GIVES MAYOR

EMERGENCY POLICE POWER

An ordinance placing the police power of Sierra Madre in the was introduced and given its first reading Tuesday night.

The ordinance is nearly identical to ordinances being adopted this week in many cities of California, and similar to ones be-

as "director of Civil Defense and Disaster" and gives him the power to proclaim a state of emergency in Sierra Madre and take immediate steps for the safety of the city. The ordinance was drafted

at the request of Councilman Herman Barter, who returned Tuesday from Sacramento

protested that he would "hate to see any form of a police state set up here" and said the law could result in a "little Caesar" for Sierra Madre.

the mayor only enough authority to act fast in an emer-

MAN CITES DANGER OF **DEAD TREES**

Attention of City Councilmen Tuesday night was directed toward what was termed "a dangerous situation" arising from the presence of dead poplar trees on Alegria.

Foster Buckner, 62 Olive St., in a letter to the councilmen, said many of the poplar trees along the south side of Alegria, between Baldwin and Auburn, have been dead for some time and constitute a menace to passers-by and residents in

the area. The danger is aggravated, said Mr. Buckner, because the dead limbs overhang Edison electric wires. Children play in the neighborhood and are in almost constant danger, he said.

Director of Public Works Glen Watson suggested that the electric and telephone companies be asked to determine if the lines interfere with the trees. If so, they should be removed by the companies, he said. Then we can see where the city's duty lies.

The matter was referred to the Planning Commission for recommendation.

the 1951 March of Dimes.

Citizens Rap 'Odor' In Neighborhood

"Please do something about

the odor." That, in effect, was the plea Tuesday night of three property owners on North Sunnyside, who asked that something be done to curb the odors arising from fertilizer in their neighborhood.

Eddie D. Robertson, 490 N. Sunnyside, as spokesman for the group, asked the City Council to draft an ordinance to prohibit the spreading of fertilizer close enough to residences to be unpleasant.

"It not only is unpleasant, but the condition is unhealthy from the standpoint of flies.' Mr. Robertson said. The Council referred the com-

plaint to City Attorney T. Guy Cornyn to find out what the city and citizens' rights are and what other communities do about the problem.

-You Can Live Through Atomic Bomb Raid--Here's How-

Distributed by OFFICE OF CIVIL DEFENSE

STATE OF CALIFORNIA

TO BEGIN with, you must realize that atom-splitting is just another way of causing an explosion. While an atom bomb holds more death and destruction than man has ever before wrapped in a single package, its total power is definitely limited. Not even hydrogen bombs could blow the earth apart or kill us all by mysterious radiation.

Because the power of all bombs is limited, your chances of living through an atomic attack are much better than you may have thought. In the city of Hiroshima, slightly over half the people who were a mile from the atomic explosion are still alive. people who were a fille from the atomic explosion are still alive. At Nagasaki, almost 70 per cent of the people a mile from the bomb lived to tell their experiences. Today thousands of survivors of these two atomic attacks live in new houses built right where their old ones once stood. The war may have changed their way of life, but they are not riddled with cancer. Their children are normal. Those who were temporarily unable to have children because of the radiation now are having children again

WHAT ARE YOUR CHANCES?

If a modern A-bomb exploded without warning in the air over your home town tonight, your calculated chances of living

through the raid would run something like this:

Should you happen to be one of the unlucky people right under the bomb, there is practically no hope of living through it. In fact, anywhere within one-half mile of the center of explosion,

on the other hand, and this is the important point, from one-half to 1 mile away, you have a 50-50 chance.

From 1 to 1½ miles out, the odds that you will be killed are

And at points from 1½ to 2 miles away, deaths drop all the way down to only 2 or 3 out of each 100.

Beyond 2 miles, the explosion will cause practically no

Naturally, your chances of being injured are far greater than your chances of being killed. But even injury by radioactivity does not mean that you will be left a cripple, or doomed to die an early death. Your chances of making a complete recovery are much the same as for everyday accidents. These estimates hold good for modern atomic bombs exploded without

WHAT ABOUT SUPER BOMBS?

Do not be misled by loose talk of imaginary weapons a hundred or a thousand times as powerful. All cause destruction by exactly the same means yet one 20,000-ton bomb would not create nearly as much damage as 10,000 two-ton bombs dropped a little distance apart. This is because the larger bombs "waste" too much power near the center of the explosion. From the practical point of view, it doesn't matter whether a building near the center of the explosion is completely vaporized or whether it is simply knocked into a pile of rubble.

To be more specific a modern atomic bomb can do heavy damage to houses and buildings roughly 2 miles away. But doubling its power will extend the range of damage to only about 2½ miles. In the same way, if there were a bomb 100 times as powerful, it would reach out only a little more than 4½, not 100 times as for

And remember: All these calculations of your chances of survival assume that you have absolutely no advance warning of

Just like fire bombs and ordinary high explosives, atomic weapons cause most of their death and damage by blast and heat. So first let's look at a few things you can do to escape these two

WHAT ABOUT BLAST?

Even if you have only a second's warning, there is one important thing you can do to lessen your chances of injury by blast: Fall flat on your face.

More than half of all wounds are the result of being bodily tossed about or being struck by falling and flying objects. If you lie down flat, you are least likely to be thrown about. If you have time to pick a good spot, there is less chance of your being struck by flying glass and other things.

If you are inside a building, the best place to flatten out is close against the cellar wall. If you haven't time to get down there, lie down along an inside wall, or duck under a bed or table. But don't pick a spot right opposite the windows or you are almost sure to be pelted with shattered glass.

If caught out-of-doors, either drop down alongside the base of a good substantial building—avoid flimsy, wooden ones likely to be blown over on top of you—or else jump in any handy ditch or gutter.

When you fall flat to protect yourself from a bombing, don't loo up to see what is coming. Even during the daylight hours, the flash from a bursting A-bomb can cause several moments of blindness, if you are facing that way. To prevent it, bury your face in your arms and hold it there for 10 or 12 seconds after the explosion. That will also help to keep flying glass and other things out of your eyes.

WHAT ABOUT BURNS?

Flash burns from the A-bomb's light and heat caused about 30 per cent of the injuries at Hiroshima and Nagasaki. Near the center of the burst the burns are often fatal. People may be seriously burned more than a mile away, while the heat can be felt on the bare face and hands at four or five miles.

To prevent flash burns, try to find a shelter where there is a wall, a high bank or some other object between you and the bursting bomb. You can expect that the bomber will aim for the city's biggest collection of industrial buildings.

A little bit of solid material will provide flash protection even close to the explosion. Farther out, the thinnest sort of thing—

close to the explosion. Farther out, the thinnest sort of thing-even cotton cloth-will often do the trick. If you work in the open, always wear full-length, loose-fitting, light-colored clothes in time of emergency. Never go around with your sleeves rolled up. Always wear a hat—the brim may save you a serious face burn.

WHAT ABOUT RADIOACTIVITY?

In all stories about atomic weapons, there is a great deal about radioactivity.

Radioactivity is the only way—besides size—in which the effects of A or H bomb, are different from ordinary bombs. But, with the exception of underwater or ground explosions, the radioactivity from atomic bursts is much less to be feared than blast

Radioactivity is not new or mysterious. In the form of cosmic rays from the sky, all of us have been continually bombarded by radiation every hour and day of our lives. We all have

also breathed and eaten very small amounts of radioactive materials without even knowing it. For over half a century, doctors and scientists have experimented and worked with X-rays and other penetrating forms of energy. Because of all this experience, we actually know much more about radioactivity and what it does to people than we know about infantile paralysis, colds, or some other common diseases.

It is easy to understand how radioactivity works if we think of how sunlight behaves

In the northern part of the world, winter's slanting sun rays seldom cause sunburn, but the hotter rays of the summer sun often do. Still just a few moments in the midsummer sun will often do. Still, just a few moments in the midsummer sun will not give you a tan or sunburn. You must stay in its hot rays for some time before you get a burn. What's more, bad sunburn on just the face and hands may hurt, but it won't seriously harm you. On the other hand, if it covers your whole body, it can make you very sick, or sometimes even cause death.

In the same way, the harm that can come to you from radioactivity will depend on the power of the rays and particles that strike you, upon the length of time you are exposed to them, and on how much of your body is exposed.

WHAT IS INITIAL RADIOACTIVITY?

Broadly speaking, atomic explosions produce two different kinds of radioactivity. First—and most important in an air burst—is an extremely powerful invisible burst of rays and particles thrown off at the time of explosion. This kind is called "initial" or explosive radioactivity. Its rays and particles fly out quickly, then promptly die. There is danger from them only for little more than a minute. The second type of radioactivity—lingering radioactivity—will be described later.

The injury range of the explosive radioactivity from a modern A-bomb is a little over one mile, if the bomb is exploded about 2000 feet in the air. If it is exploded much higher some of the radiation may not reach the ground, so the range may be less. If it is exploded much lower, the radiation also may not reach out as far, because it would be blocked by the ground or by buildings.

A little more than a mile away, the principal effects of the few dying rays that struck you could be seen only as temporary blood changes in a doctor's examination. You probably wouldn't even realize you had been exposed.

A little less than a mile from the explosion center, if you are unprotected, you are almost sure to suffer illness. Less than two-

WHAT AN ATOMIC BOMB explosion looks like. Here is the Bikini bomb test, the one exploded among the Bikini Islands in the Pacific for effect in water. This was after the bombing of Japanese cities of Hiroshima and Nagasaki.

thirds of a mile away, those caught in the open are pretty sure to soak up a fatal dose of radioactivity.

Still, the possibility of your being caught without some protection is not very great. Even if you are on the street, there is a good chance that a building, or many buildings, will be between you and the burst, and they will partially or completely shield

Atomic explosions high above ground cause the most wide-spread damage. And, as happened in Japan, when an A-bomb goes off in the air you are far more likely to be hurt by the bomb's blast and heat waves than by its radioactivity. At Hiro-shima and Nagasaki slightly over one-half of all deaths and injur-ies were caused by blast. Nearly one-third of the casualties were from the heat flash. Radioactivity alone caused only about 15 per cent of all deaths

and injuries.

If the bomb were to go off close to the ground, or slightly below its surface, the range of the explosive radiation, as well as the range of the blast and heat, would be reduced. This is due to the fact that all three would be partially blocked by the earth, by nearby buildings and by other obstacles.

In an underwater burst, there would be much less to fear from blast and nothing to fear from heat. Practically all the explosive radioactivity would be absorbed by the water. However, there would be the second type of radioactivity to be described later on.

WHAT ABOUT INDUCED RADIOACTIVITY?

If an atomic bomb goes off in the air within two-thirds of a If an atomic bomb goes off in the air within two-thirds of a mile or slightly more of your home, there is no practical way of keeping explosive radioactivity out of the above-ground part of your house. It is possible that, at very short range, artificial, or induced radioactivity could be set up in gold, silver, and many other objects. However, this kind of radioactivity will never offer great danger, so don't throw away bandages and other first aid materials in the medicine cabinet. They will be perfectly safe to use.

Naturally, the radioactivity that passes through the walls of your house won't be stopped by tin or glass. It can go right through canned and bottled foods. However, this will not make them dangerous, and it will not cause them to spoil. Go ahead and use them, provided the containers are not broken open.

WHAT ABOUT RADIATION SICKNESS?

Should you be caught upstairs or in the open at the time of a bombing, you might soak up a serious dose of explosive radioactivity. Even so, the first indication that you had been pierced by the rays probably wouldn't show up for a couple of hours. Then you most likely would get sick at your stomach and begin to vomit. However, you might be sick at your stomach for other reasons, too, so vomiting won't always mean you have radiation sickness. The time it would take you to get sick would depend on how strong a dose you got. The stronger the dose, the quicker you would get sick. For a few days you might continue to feel below par and about two weeks later most of your hair might fall out. By the time you lost your hair you would be good and sick. But in spite of it all, you would still stand better than an even chance of making a complete recovery, including having your hair grow in again.

WHERE IS THE BEST PLACE TO GO?

If your house is close to the explosion, there is little you can do to protect it from the bomb's blast, or pressure wave. Within one-half mile of the surface point directly beneath the explosion, the shock wave for one-half mile of the surface point directly beneath the explosion, the shock wave from an atomic bomb is sure to flatten most houses. Out to a distance of about one mile, steel, brick, and wooden structures are likely to be damaged beyond repair. Farther out there is less destruction, but serious damage may be expected to extend as far as two miles.

It is only wise to figure that the upper floors of most buildings near the explosion will be pushed in. This means the base-

ment is probably the safest place to be. If you have a basement and time to get down to it, lie flat along the outer wall or near the base of some heavy supporting column. You would be even safer under a cellar work bench or heavy table. Stay away from the middle of the floor where falling beams and other objects are most likely to strike you. most likely to strike you.

Naturally, you run a risk of being trapped in the wreckage. but your over-all chances of escape from the bomb in most cases are many times greater than they would be upstairs. If your basement has two exits, you will be in less danger of being

Besides protecting vou from blast and heat, basements also provide shielding from explosive radiation. Because, the lower you get, the more barriers against radiation there are likely to be between you and the bursting bomb. Down in the cellar you'll probably be shielded not only by other buildings, but also by earth and the cement foundations of your own house. Earth, concrete and steel are good radiation bervious concrete and steel are good radiation barriers.

If you have no basement, look around your immediate neigh borhood for a nearby shelter you can get to quickly in an emergency. Such a shelter might be a culvert, a deep gully or another building within easy reach. If you live in rolling country, there is probably a hill close to you. Even a high bank will offer some protection from most bursts if it is between you and the explosion. In choosing your shelter, assume that the enemy will aim for the industrial buildings.

If you live in a state where there is danger from sudden storms like cyclones or hurricanes, you may have a "cyclone cellar" or something similar. If so, you have a shelter that will give excellent protection against atomic bombs

Starting right now you should go in for "fireproof housekeeping." Don't let trash pile up around your house and always keep it in covered containers.

Kill the Myths

ATOMIC WEAPONS WILL NOT DESTROY THE EARTH

Atomic bombs hold more death and destruction than man ever before has wrapped up in a single package, but their overal power still has very definite limits. Not even hydrogen bombs will blow the earth apart or kill us all by radioactivity.

DOUBLING BOMB POWER DOES NOT DOUBLE DESTRUCTION

Modern A-bombs can cause heavy damage two miles away, but doubling their power would extend that range only to 2½ miles. To stretch the damage range from 2 to 4 miles would require a weapon more than 8 times the rated power of present

RADIOACTIVITY IS NOT THE BOMB'S GREATEST THREAT In most atom raids, blast and heat are by far the greatest dangers that people must face. Radioactivity alone would account for only a small percentage of all human deaths and injuries, except in underground or underwater explosions.

RADIATION SICKNESS IS NOT ALWAYS FATAL

In small amounts, radioactivity seldom is harmful. Even when serious radiation sickness follows a heavy dosage, there is still a good chance for recovery.

Five Keys to Household Safety

1-STRIVE TO FIREPROOF HOUSEKEEPING

Don't let trash pile up, and keep waste paper in covered conners. When an alert sounds, do all you can to eliminate sparks by shutting off the oil burner and covering all open

house closed until all danger is past.

2-KNOW YOUR OWN HOME Know which is the safest part of your cellar, learn how to turn off your oil burner and what to do about utilities.

3—HAVE EMERGENCY EQUIPMENT AND SUPPLIES HANDY Always have a good flashlight, a radio, first-aid equipment and a supply of canned goods in the house.

4-CLOSE ALL WINDOWS AND DOORS AND DRAW BLINDS If you have time when an alert sounds, close the house up tight in order to keep out fire sparks and radioactive dusts and to lessen the chances of being cut by flying glass. Keep the

5-USE THE TELEPHONE ONLY FOR TRUE EMERGENCIES Do not use the phone unless absolutely necessary. Leave the

lines open for real emergency traffic. It you know you have time when an alert sounds, be sure to shut the doors and windows and pull down the shades. This will help keep out fire sparks.

If you have shutters or venetian blinds, or heavy drapes they will also provide some protection against harm from flying

Several other household precautions should be taken promptly. Atomic bombs set off high above ground seldom cause breaks in underground gas or water mains. However, shaking and twisting of the buildings by the blast wave sometimes snaps off household inlets at the point where they enter the basement. This may allow gas or oil to flow into your cellar.

To lessen the danger of fires and explosions that could result from this leakage, you should throw the electric switch that shuts off your oil burner. Your local utility companies can give you detailed instruction

about your gas, pilot lights, and so on. If you have a coal-burning furnace or wood stove, be sure to close all its fuel and draft doors. In other words, do all you can to prevent sparks and to put out or cover open flames.

Should attack come without warning, take these same precautions right after the raid. Keep at least one flashlight handy and don't strike a match to light your way down into a darkened Gas or oil fumes may be present and an explosion

WHAT ABOUT LINGERING RADIOACTIVITY

Knowing how to protect yourself from blast, heat, and explosive radioactivity only one major problem remains: That is how to avoid harm from lingering radioactivity.

Explosive radioactivity bursts from the bomb at the time of

the explosion and lasts for only little more than a minute.

Lingering radioactivity remains for a longer time, from a few minutes to weeks or months, depending on the kind of radioac-

Lingering radioactivity may become a danger when atomic bombs are exploded on the ground, underground, or in the water.

Air bursts leave no dangerous lingering radioactivity. Most lingering radioactivity comes from leftover bomb wastes, or "ashes," technically called fission products. They consist of countless billions of fragments, or pieces, of atoms split up in the explosion. Smaller, and usually less dangerous, amounts of lingering radioactivity may be thrown off by scattered atoms of uranium or plutonium that fail to split up when the of uranium or plutonium that fail to split up when the bomb

goes off.

These totally invisible radioactive particles act much the same as ordinary, everyday dust. When present in any real quantity, they are scattered about in patches and contaminate, or pollute, everything they fall on, including people. While they can be removed easily from some surfaces, they stick very tightly to others. It is practically impossible to get absolutely all of them. to others. It is practically impossible to get absolutely all of them out of the household corners and cracks. Most of the time, it is far easier to prevent pollution than it is to remove it.

WHAT ABOUT RADIOACTIVE CLOUDS?

WHAT ABOUT RADIOACTIVE CLOUPS?

In spite of the huge quantities of lingering radioactivity loosed by atomic explosions, people fortunately are not very likely to be exposed to dangerous amounts of it "a most atomic raids.

Since high-level bursts do the greatest damage, that is the kind we can expect most often. When atomic weapons are exploded in mid-air, the violent, upward surge of super-hot gases and air quickly sweeps practically all the radioactive ashes and unexploded bits of bomb fuel high into the sky. Most of them are carried harmiessly off in the dritting bomb clouds. High-level explosions definitely will not create 'areas of d-om'' where no man dares enter and no plant can grow. In fact, they will leave very utitle radioactivity on the ground, even near the point of explosion. Firefighters are rescue teams can move promptly toward the center of destruction with little danger of facing narmful radiation.

And regardiess of all you may have heard or read concerning the dangers of radioactive abouts, after the first minute and a half there is actually ittle or nothing to fear from those produced by high-level bursts. While most of the radioactive masterials swept up into the sky eventually fail back to earth, they are so widely and so thinly spread that they are very unlikely to offer any real dangers to humans. Thousands of bombs would have to be set off in the air before serious ground contamination would be found over really large areas. There was no ground-level pollution of any importance following either of the two Japanese atomic bombings.

It was said earlier that 15 per cent of the Japanese A-bomb deaths or injuries were aused by radioactivity caused them ail.

WHAT ABOUT GROUND, WATER BURSTS? Bursts on or near the ground usually will teave a limited area of rather heavy and often dangerous pollution near the exposion point. In such cases, the possibility of harm from radioactivity failing out of the clouds is greater than in high-level explosions. But even so, a person could escape contamination by simply taking refuge inside a house or even by getting inside a car and rolling up the windows. And even if some of the wastes fell on him, he would lessen his chances of injury if he promptly shed his clothes and took a bath or shower. In underwater explosions, large portions of the bomb's radioactive wastes will be "trapped" by the water and then spread over the immediate area. Under these conditions serious ground pollution is to be expected.

After a water or underground burst a cloud of very radioactive mist or dust might form and spread, particularly downwind, injuring people who weren't well sheltered.

If the explosion has been underground at

might form and spread, particularly downwind, injuring people who weren't well sheltered.

If the explosion has been underground, at ground level, or in the water, stay in your shelter. If caught in the open, get indoors right away. Then stay indoors for at least an hour or until you get instructions. It may be necessary to stay inside for three or four hours. The reason for this is that most lingering radioactivity loses its power very fast. So staying undercover for a while will greatly reduce the danger.

Any rain or mist that comes right after an atomic expression should be considered dangerous, even though it may not always be radioactive. Keep from getting wet if you possibly can.

And "emember that an air burst will leave no lingering radioactivity of importance, so after a few minutes it will be safe to get out and help fight fires or to help people who may need it.

HOW IS RADIOACTIVITY DETECTED?

While we cannot see, hear feel, smell or taste radioactivity, its presence readily can be detected with Gelger counters and other instruments. However, you won't have to know how to use one of these. Instead, you can rely on your local radiological defense teams—a small, specially trained corps of "meter readers" to warn you of the presence of lingering radioactivity. You also can count on them to see to it that firefighters, rescue workers, and other people who may have to enter contaminated places do not remain there long enough to be injured.

But always remember our sunlight comparison. There is usually a whale of a difference between detectable and dangerous amounts of radioactivity. The rays and particles from an ordinary, luminous-dial wrist watch will cause a roar in the earphones of a Gelger counter, as just one example. We must not tose our heads just because radioactivity is reported as present.

WHAT ABOUT PROTECTING YOURSELF FROM LINGERING RADIOACTIVITY?

While attempting to avoid exposure to the bomb's blast, neat, and explosive radioactivity, also do what you can to keep from being showered by radioactive waste
materials. Inside a shelter or building there is little or nothing to fear from this
source. But if caught out-of-doors, try to grab hold of something to cover yourself
with when you fail to the ground. A board or some sheets of newspaper might nelp,
but a raincoat would be better. The object is, of course, to keep radioactive dust
and raindrops off your body and clothing. When it's safe to get up throw away your
covering.

and raindrops off your body and clothing. When it's safe to get up throw away your covering.

Always do what you can to help other people. There is no chance of your being harmed by radioactivity from the bodies of others, even if they have radiation injuries. Don't leave injured people where they may be burned. Direct rescue workers to persons trapped in the wreckage. If necessary to bandage open cuts and wounds and no standard first aid equipment is available, use parts of your own or the victim's clothing. But lear them from the under, not the outer garments. Underschotes are tar less likely to be contaminated by radioactivity.

If you have walked through rubble from a ground burst or water from an underwater burst, be sure to change at least your outer garments and shoes. Outer clothes will automatically serve as a "trap" for most of the radioactivity you may accidentally pick up. By taking them off you will remove most of the contamination. If the clothing is heavily contaminated it is best to bury it.

You also should manage to take a bath or shower, if you have been in an area of lingering radioactivity. It is important that all radioactive materials be removed as soon

You also should manage to take a bath or shower, if you have been in an area of ingering radioactivity. It is important that all radioactive materials be removed as soon as possible from your body, and bathing is the only practical means of getting rid of them. You won't need special cleaning compounds. Warm water and soap are ideal. In washing, pay particular attention to your hair, for that is one place where the wastes are sure to pile up. Also give your hands a good scrubbing and get all dirl out from under your fingernals. If there is a radiological defense man handy, have him check you with his meter after you've finished your clean-up. Should he find your body still radioactive, again scrub you've finished your clean-up. Should he find your body still radioactive, again scrub you've finished your clean-up. Should he find your body still radioactive, again scrub yourself from head to foot. Then do it a third time if necessary You can remove practically all of the radioactivity if you keep at it.

Remember all this is necessary only for persons who have come in contact with radioactive materials in heavily contaminated areas.

WHAT ABOUT RADIOACTIVITY IN THE HOUSE?

A few sinole steps will go a long way toward keeping your house from being contaminated by lingering radioactive wastes scattered about in some bombings. As a rule, it is far easier to prevent radioactive pollution of a household than it is to remove it. Keep all windows and doors closed for a least several hours after an atomic bombing. In fact, better leave them shut until rivil defense authorities pass the word that there is no lingering radioactivity in your neighborhood. Should you get an official report that there is serious contamination in the vicinity, better cover all broken windows with blaskets or cardbaard.

Whenever there is widespread neighborhood pollution, it will be impossible to keep your house absolutely free of it. A little is bound to seep in through cracks or else down the caimney. (By all means close the dampers in fireplace flues and shut off airconditioners and ventilating fans not equipped with special filters.) Unless you are carful, some radioactivity is likely be tracked in by people or pets. Keep your cat of log indoors. And when you come in from outside, leave your shoes at the door, for their soles are likely to be covered with radioactive dusts. Better still, wear rubbers, galoshes or other disposable foot coverings over your shoes. Take these precautions, but don't worry. There isn't much chance really dangerous amounts will pile up in the house.

the house. Should you help to clean up a contaminated area, you might get some radioactive materials on both your body and clothing. So don't go home and sit around in your work clothes. Take off your outer garments outdoors or in the basement. Then wash, if you can, using warm water and plenty of soap. Never fall to launder your working clothes, but don't use the family washing machine. Scrub all contaminated objects in buckets or tubs used for that purpose only.

WHAT ABOUT FOOD AND WATER?

To prevent harm from accidentally eating or drinking radioactivity, throw out all unpackaged foods that were lying around where dust from ground bursts or mist from underwater bursts might have settled on them. And before opening canned or bottled goods, wash the outside of the containers thoroughly. That will remove most of the pollution that may have gotten on them. Also be sure that all cooking utensils and tableware are scrubbed clean in order to remove any invisible, radioactive dusts. Food and utensils that were in closed drawers or light cupboards will be all right.

If it was an air burst, don't worry about the food in the house. It will be safe to use. If it was an air burst, don't worry about the 1000 in the 1005.

Be careful of drinking water after atomic explosions. There is little or no chance that water actually inside household pipes at the time of attack will be made radio-active. If a little is drawn off right after the burst and placed in clean containers with 7002s, it should they ou over the immediate post-raid period.

But even if the water continues running don't keep on using tap water for drinking ourpose; unless you have received official information that the city system is safe. This is not only because of radioactivity, but because of other dangers like typhoid that car come from damaged water systems. If you have to use city water before you get official information, boil it. Boiling won't remove radioactivity, but the chances that your water supply will be radioactive are pretty slim. Boiling will kill most germs that may set into damaged water mains.

WHAT ABOUT RADIOS AND TELEPHONES? Neither explosive nor lingering radioactivity has any effect on the operation of most mechanical or electrical devices. Unless the wires are down or there is a power failure, both your lights and telephone should craftine to work. But don't rush to the phone just to find out how Aunt Susie may have weathered the attack. Leave the lines open or ceal emergency traffic.

The oomb's radioactivity will not interfere with the operation of your radio. In the event of attack be sure to turn it on. It may be yout main source of emergency instructions. And don't forget: Battery-operated portable sets, including those installed in automobiles, will continue to work even if the city power goes dif. Television reception, like radio won't be jammed by radioactivity.

WHAT ABOUT AUTOMOBILES?

One more household suggestion: In times of emergency don't park the family automobile on the street. Leave the way clear for emergency traffic. Keep the windows rolled up to prevent possible contamination of the interior by underwater or ground bursts and don't worry whether or not it will run. Radioactivity won't interfere with operation of its fuel or ignition system.

WHAT ABOUT CHILDREN?

Everything in this bookiet holds true for all members of the family, including chemen, old people, or shut-ins. It would be a good idea to talk over the facts with a members of the family to be sure each understands. People with school children shou discuss the bookiet with teachers and other parents at PTA meetings and similar gaterings. or may be sure that, in times of emergency all schools will be well organized protection of children. Ididen old enough to understand can be taught to do the right things. Younger in simply will have to depend on their parents.

now ward it off with a snot to the said, and the stand far better than an even avoid it.

If you follow the pointers in this little bookiet, you stand far better than an even chance of surviving the bomb's blast, heat, and radioactivity. What's more, you will make a definite contribution to civil defense in your community, because civil defense must start with you. But if you lose your head and blindly attempt to run from the dangers, you may touch off a panic that will cost your life and put tremendous obstacles to the way of your Civil Defense Corps.

Tom Henderson Plans Mexico Fish 'Caravan'

A caravan of Sierra Madre fishermen to Mexico was proposed this week by Mr. and Mrs. Tom Henderson, 85 E. Sierra Madre boulevard.

The Hendersons returned last Friday night after a two-week, surf-fishing trip along the Mexican coast. Mr. Henderson reported "exceptionally good fishing."

Mr. Henderson pointed out, by the way, that all entrance fees for fishermen have been taken off, from Mexicali to San

Concerning a possible fishing expedition for Sierra Madreans, he said local citizens could pool their supplies and go as a caravan. Mr. Henderson tentatively set the trip for the first week in February.

information pamphlets will have to be mailed frequently. Mr. Brain asked residents clerical work in their homes. city to fill out application blanks available at the City

LEES LEAVES **NEALE FIRM**

Richard W. Lees will end his duties as manager of the T. W. Neale Insurance Firm, 66 W. Sierra Madre boulevard, next Monday, Jan. 15.

Mr. Lees, who has been associated with the firm for 31/2 years, said he will miss the 'pleasant relationship he has enjoyed with local residents. business people, and with Mr.

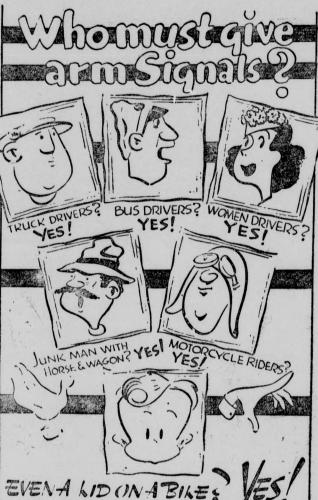

He said he has "nothing definite" in mind for his next job. Before coming to Sierra Madre, he was employed in the fire prevention engineering department of a factory insurance company. Mr. Lees said he and his family still will reside at 312 E. Grandview.

Mr. Neale said Mrs. Elsie Tapp has been employed as bookkeeper and he, himself, will take over the insurance managerial duties.

RESUMES STUDIES

Fritz Drumheller flew back to the University of Idaho, Wednesday, where he will resume his studies. He is a first year student at U. I. Fritz is the son of Mrs. Jordan Wein, 375 E. Montecito.

"Give the proper arm signal at the proper time." Vehicle drivers have learned that proper arm signals make driving easier and safer. When riding your bike, let the other fellow know what you intend to do by using the proper signal whenever you turn, slow down or stop.

Health Officer Praises Press

The value of the press in protecting the public's health was cited last week by Dr. Roy O. Gilbert, L. A. County health

It was only through the publicity given in a San Gabriel Valley newspaper of a case of dog rabies that Harry Ford, Monrovia mail carrier, learned he had been bitten by a rabid dog. The news item was credited with saving Ford's life.

Dr. Gilbert stressed the importance of being positive all animal bites are properly treated and that such incidents be reported immediately to the local officer.

"Bear in mind that rabies in human beings is 100 per cent fatal-it cannot be cured," Dr. prevented."

MAD Offers New **Lecture Series**

The Monrovia-Arcadia-Duarte Evening High School Forum is looking forward to a successful series of four more lectures beginning Jan. 18.

Speakers and timely topics are as follows: "What's Next in China?", Dr. Theodore Chen, Jan 18; "Behind the Headlines in East Asia." Claud A. Buss, Feb. 1; "Argentina: Problem Child of the Western Hemisphere; Hubert Herring, Feb. 15 and "The World Is Watching Us," Kent Roberts, March 1.

Individual or season tickets for the lectures are available at the MAD Evening High School office.

Gilbert warned. "However, with proper treatment, it can be

State of California Office: CUster 5-3388 My Commission Expires May 2, 1952 Res. CU. 5-3364 Res. CU. 5-1137 No. of Bank 721

You may not have known what caused holes to appear in the bark of your tree or shrub last summer, or what created loose frass that looked like sawdust on the outer surface of the bark. But 10 chances to 1 it was a BORER working underneath the bark. Righ now that very same Borer is down in the soil around the base of that shrub or tree, hibernating through the winter, laying eggs and hatching young. The first warm days will send these Borers scurrying for food, starting up the juicy corridor between the cambium and cortex tissue of the tree, where the sap flows, destroying the tissues as they go. It will be too late then to kill them with any spray material because they will be safe underneath the bark. But you CAN kill them NOW-WITHOUT SPRAYINGjust by pouring a little diluted BORER-SOL into the soil round the base of that shrub. BORER-SOL is an "ether" emulsion, and the fumes spread through the soil and kill harmful insect life without harming the plant. The liquid contains no oil. It is SAFE for the soil. Be sure to water well before using it (unless the ground is moist from recent rain) and use it promptly so as to PREVENT DAMAGE before it is done. Don't delay this important job. "It's later than you think." Incidentally, it is a wise bit of precaution to use BORER-SOL or other borer-killer this way where you are planting young trees of almost any kind.

TWIG BORERS on Peach, Plum and other stone fruit trees are a different species. The adult is a flying moth which lays eggs in the branch structure, Larvae or worms emerge later and create injury which becomes apparent as a gummy liquqid oozing through the bark. For THIS Borer, you must spray the tree with Cryocide or Arsenate of Lead: 1 level tablespoon to each gallon of water-or put it into your diluted CALSUL in the same proportions when you make your clean-up spray in the Spring. FREE: Would you like to have our FREE BULLETIN on Borers?

Local Masons To Install **New Officers**

New officers of Sierra Madre Lodge No. 408, F. and A. M., will be installed next Wednesday night, Jan. 17, at the Masonic Temple, 33 E. Sierra Madre boulevard.

John C. Mead will be installed as master, succeeding John

W. Adams. Other officers to be installed include Thomas C. Pollgreen. senior warden: Harry B. Humphreys, junior warden; Wilbur S. Hull, treasurer; Raymond B. Pease, secretary; William E. Bowers, chaplain; James W. Moore, senior deacon; Henry Vis, junior deacon; Nelson E. Morrison, marshal; Thurman Corneth, senior steward. Stanley Coutant, junior steward; Thomas R. Meader, P. M., organist; and Henry Rintleman, P. M., tiler.

Installing officer will be Stephen E. Skidmore, inspector of the 93rd Masonic District. George Morgridge will serve as master of ceremonies. The colorful rites begin at 8 p. m.

Legion Seeks Toys To Send Overseas

Legionnaires of the nation have advised that actress Patricia Neal, star of Warner Brothers' "Operation Pacific." has been named "Top Princess" for the American Legion's second annual "Tide of Toys" campaign to send toys to children overseas.

Unbroken toys, except of a war-like nature, will be collected at all Legion posts and forwarded to Philadelphia for packing and routing to Europe. Distribution to children in the "have-not" nations will be under Legion sponsorship.

The campaign began Dec. 26 and will end Jan, 20. Bing Crosby is honorary national

Judy Notes 8th Birthday

Lolly-pop ladies dressed in blue and white crepe paper, yummy cup cakes with separate candles to blow out, crayolas, color books, and plenty of entertainment. These were some of the highlights of the birthday party given for Judy Young on her eighth birthday. Thursday, Jan. 4.

A birthday supper was served at 5:30 P. M. after which each of the invited guests participated in a part of the entertainment, and was given a chance to display their talents. Selections on the piano were given and dancing was enjoyed by the group.

Judy's guests were Kathleen McKesson, Jackie Toothaker, Sandra Koerner, Beverly and Jean Brahn, Vicki Sue Carlson, Karen Deutch and Linda Revis.

ELKS RESUME **GAME PARTIES**

Popular semi-monthly game parties for Elks, their lady friends and wives, will be resumed Friday night, Jan. 12, beginning at 8 o'clock at the Monrovia Elks Clubhouse.

The last one, held shortly before the holidays, drew the largest attendance of the season. Many Elks are inviting guests to make up parties for tomorrow night's event, accordig to Ray Rankin.

DAUGHTER BORN

Watsons Have Florida Guests

Professor and Mrs. E. R. Smith of Tallahassee, Florida, have been holiday guests of their daughter and son-in-law. Mr. and Mrs. Alton Watson, 320 W. Orange Grove. Professor Smith was affiliated with the Florida State College before it became Florida State University. Mrs. Watson's parents leave for Florida Jan 10.

Lt. Commander and Mrs. J. M. Arbuckle and their three-andand-half-month-old daughter, Jan, from Los Altos, California, were also guests of the Watsons for a few days.

'OPERATION CAT' ENDS HAPPILY

Representatives of both the Fire and Police Departments teamed up Sunday to go to the rescue of a cat.

The feline, stranded at the top of a palm tree in the city cemetery, was finally brought back to safety by Officer Paul R. Bird and Fireman Ralph Twedell.

Neither the cat nor its rescuers were injured in the hectic operation, reports Officer Bird. The cat had been trapped for almost 24 hours.

Shirley Prosser Entertains Friends On 10th Birthday

Shirley Prosser, daughter of Mr. and Mrs. F. J. Prosser, 750 Alta Vista, recently entertained a group of friends at the Pasadena Winter Garden, with an ice skating party to celebrate her tenth birthday.

A jolly time was enjoyed by her 27 guests. After skating the voungsters returned to the Prosser home for birthday cake, cream, cookies and soft drinks.

Miss Lois Dvorshak, internationally known figure skater, lately known as the Rhythm Girl of the Ice Follies, assisted the group, Mrs. Martha Arnold of Arcadia, Leader of Girl Scout Troop No. 13 of Sierra Madre, Mrs. Johns of San Bernardino and Mrs. John Richardson of San Gabriel, also were guests of the evening and assisted the

Local Man Opens New Office

Alden Webster has announced this week that he is opening an Insurance Office at the Realeteria Shopping Center, 304 W. Sierra Madre Blvd., opposite the post office.

Mr. Webster an insurance man of several years' experience, will be assisted by Leonard M. Yates, an associate of John H. Osgood.

With his family Mr. Webster resides at 305 E. Laurel Ave.

BETROTHAL TOLD FOR SIERRA MADRE **COLLEGE STUDENT**

ON THE FAIRWAY

this week.

ers" apiece, but also provided the fielding gems of the day. Frazier made remarkable stops to hold hits to one base instead of two; Dixon was stopping hard-hit balls all afternoon; and Schaefer was all over left field making hardrunning catches that had the

fans applauding. For the first time in local ball park history, the Raiders were held to only five hits. First-sacker Evans and Manager Larry Shepherd, playing catcher, each collected twobase hits.

The Widner brothers of Glendale, and especially Jack Widner who pitched last year for Norfork in the Piedmont League and goes to Portland this year, held the strong Raider hitting attack in check and struck out all three Sierra Madre batters in the 5th, 7th, and 9th innings.

The Glendale Thunderbirds boast a team of "name" players and are a "triple-A" club. During the winter months, many of their players come

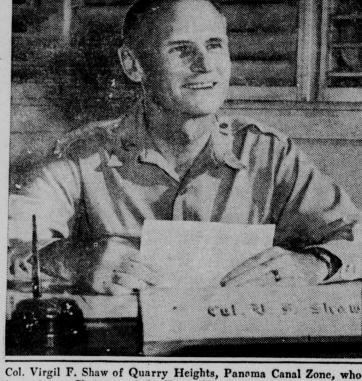

from big league farm clubs. Next Sunday's game at the city ball park has not been scheduled as yet, but it is expected that Foothill League play will resume Sunday after a layoff of two weeks during the holidays.

is serving as Chairman of the Every Member Canvass at the Episcopal Cathedral of St. Luke. Active in military work in the Canal Zone, Col. Shaw finds time for such Church activities as this chairmanship, and he sings regularly in the Cathedras choir. In his military career he has been active in Church work wherever he is stationed, and takes a profound interest in community affairs.

are a few statistics on same. 1948—Ben Hogan set a Riviera course record with his 275. 1949—The loss of the only four time winner in L. A. Open history, MacDonald Smith. who died at his home that summer was felt. He was one of the giant killers. Lloyd Mangrum won this tourney.

1950—Last year's tournament as most remember was really won with that unerring putt on the 18th by Sam Snead, who was supposedly weak in that department. The shot tied him with Ben Hogan whom he later topped in the playoff.

1951-Lloyd Mangrum won this year's tournament with a score of 280.

ON THE DIAMOND

One of the So. Calif. Baseball Assn. triple "A" clubs from Glendale invaded our local ball park Sunday and proceeded to take our team apart. Oaks started the pitching chore for the Raiders but was off his stride and Mgr. Larry Sheppard was forced to send him to the showers in the last half of the third inning with one man out. Stueve then took the mound for the remainder of the game and allowed the visitors but 3 scattered hits. But with a final score of 8 to 1 against the home team it is evident the boys were too light with the bat. But such things failed to read the ground happen occasionally, especialwhen you are hitting against a pitcher with the ability shown by Jack Widner who is pitching for Glendale this winter and reporting to Portland in the Pacific Coast League next spring.

Cowboy and gangster movies will be banned in Indonesia this year, upseting he U.S.A. film companies' bookings there for 1951, with roughly 300,000 Indonesian youngsters still in possession of guns and ammunition, the government regards Hollywood 'blood and thunders' as a bad influence.

Planetarium Offers 'Journeys' to South

Arm-chair astronomers are being taken on nightly trips deep into southern latitudes as Griffith Park Observatory presents its initial 1951 attraction, "Under the Southern Cross."

The show, which takes stargazers far into the southland where many of our constellations are seen upside down, is considered one of the most interesting of the two dozen different programs produced at the planetarium, according to Dr. Dinsmore Alter, observatory

KIWANIS PLANS

'LADIES' NIGHT'

A "revolving canasta party" is in store for Sierra Madre Kiwanians and their wives Tuesday, Jan. 23, when the club

holds a ladies' night dinner. The Board of Directors voted last Thursday to make the function a combined Sierra Madre club charter night and Kiwanis International birthday party. Chamber members of the club will be invited to attend the dinner.

Cub Pack Plans Annual Breakfast

Plans are going ahead this week for the Annual Father and Cub Breakfast, scheduled for Sunday, Feb. 18, at the City School cafeteria

A large crowd is expected at the breakfast, starting at 7:30 a, m., which is the only affair of the year to raise money for the Cub Pack 1 fund, according to Ralph Hurwit, assistant

LEGAL NOTICE

BEFORE THE CITY COUNCIL NOTICE OF PUBLIC HEARING

Notice is hereby given that a public hearing will be held by the City Council of the City of Sierra Madre on Tuesday, January 23, 1951, at 8:00 P. M. in the Council Room of the City Hall of Sierra Madre, for the purpose of hearing evidence, objections or arguments for or against a proposed change or amendment in Ordinance No. 391, the Land Use or Zoning Ordinance of the City of Sierra Madre.

The matter to be considered is a change or a reclassification of the property described as

Portions of Lot 2, Sierra Madre Tract which real propery is located at 430 West Sierra Madre Blvd.

Said real property is now classified as an R-1 (Single Family) residence district, and it is proposed that the ordinance of the City of Sierra Madre be amended to reclassify said property as an R-3 (Multiple Family) residence district. Any interested person may appear, either in person or by

an agent or representative, at said public hearing and be heard. CITY COUNCIL OF THE CITY OF SIERRA MA-

DRE By Lawrence B. Brain, City Clerk. Publish 1-4,11-51.

Cub Dens to Get Awards

All seven dens of Cub Pack will receive handicraft awards at the next Pack meeting, scheduled for Jan. 19, 8 p. m., at the City School auditorium.

At a meeting of the Cub night at the home of Mrs. Thel- lucky. ma Gruber, 24 Cypress Court, it was decided to make the awards because of the "splendid display" of handicraft work at the December pack meeting.

Attending the committee meeting were Cubmaster Marcus Woodward, Assistant Cubmaster Ralph Hurwit, Institutional Representative Foster Buckner, Cub Committeeman Murray Hawkins, and the following den mothers: Betty Burr, Louise Willis, Gwynne Dewey, Mrs. Gruber, and Anna Mackanic. Several absences were reported due to illness.

Woman Falls **Out of Car**

A woman was shaken up but apparently escaped with only slight injuries Friday noon when she fell out of a moving automobile.

The woman, Mrs. Rosa G. Curran, 73, of 3875 Mayfair, Hastings Ranch, crashed to the pavement at Mountain Trail and Montecito when she tried to close the car door which was partially open.

Mrs. Curran and her daughter, Mrs. Eilleen Curran Lewis, driving the car, had just left a service station when they discovered the door was ajar. Mrs. Curran attempted to slam it shut, she tumbled out.

Dr. P. R. Woodworth said the woman was "badly shaken up," but that apparently no bones were broken. She was taken to her home by ambulance.

Field Pupils Edit Paper

Sixth-grade students at Eugene Field School in the Hastings Ranch recently went into the newspaper business.

The boys and girls of Mrs. Etta Vasse's class published their first edition of Field Flashes, four-page mimeographed school paper.

Pupils handle all phases of producing the paper-including writing, editing, layout, and mimeographing—in keeping with their study unit in journalism. Every news story carries the "by-line" of its re-

On page 1 of the first edition, the paper's "aim" was set forth poetically by Reporter Bobby Christmas:

"This isn't just a newspaper at which you'll take a glance, but this newspaper you'll read if you have the chance. It doesn't tell of war and it doesn't tell of fear, but it tells of all the news in your school

SIERRA MADRE NEWS

Mrs. Skutt's **Mother Taken** By Death

Final rites were held yesterday afternoon in Paramount for Mrs. John Walton Johnson, mother of Mrs. Chas. A. Skutt of this city.

Mrs. Johnson passed away Saturday following an extended illness. Mr. and Mrs. Skutt attended the services.

Surviving also is a sister, Long Beach. Mrs. Thompson of Amelia, Nebraska., two sons, Ray Walton Johnson of Burbank and Burton Edward Johnson of Nebraska and Wyoming.

Trial Saturday In Assault Case

A jury trial is scheduled Saturday, Jan. 13, at 10 a. m., for Harry W. Linton, 30, of Arcadia, who was arrested and jailed Dec. 31 on charges of assault and battery.

Linton is accused of "beating up" Helen L. Silva of 139 S. Baldwin. He pled not guilty and was transferred to the county jail when he did not pay the \$500 bail.

Mrs. Johnson has lived the last 26 years in California formerly resided in New York,

FIRE

FLAMES

Without rain, what green we now have soon will turn brown. Mother nature has not failed us during the many, many years his nibs has been in Sierra Madre. But right now there is sufficient deadwood beneath the brush to create a tremendous fire if it gets half

a chance. When using fire, we MUST remember this fact. Those who ask for fire permits are still responsible if the fire gets away

from them in a wind stormor for that mater they MUST NOT burn during a wind. Good judgment must be used when open burning is anticipated.

The Right Reverend Henry Knox Sherrill, first president of the

newly constituted National Council of the Churches of Christ in

the U. S. A. Bishop Sherrill is Presiding Bishop of the Protestant

Episcopal Church. As president of the new Council, he is head of

a body representing 31,000,000 Christians, who are members of 29

denominations and interdenominational agencies. Bishop Sherrill

was elected at a constituting convention in Cleveland, which

created the new Council, and at the convention he was referred

to as the most important ecclesiastical personality in the United

Here are a few "NOTS": Not during a wind. Not too close to inflammables. Not too large a fire. (A large flame carries a large ember.) Not near the mountain brush. Not without control. Not at the time your good neighbor has a clothesline full of clean wash. And surely not without proper clearance around the

We don't have many fires in Sierra Madre simply because we try to be careful. Let's continue to be careful.

Your fire fighters have just completed the annual Christmas activity and are now ready to concentrate on fire fighting with double effort to make up for lost time. Much must be remembered about the use of equipment and the methods of fighting fire. It is easily forgotten without continuous practice.

We realize the important part the fire department plays in the Civil Defense program. We must be planning and drilling for what may happen. Fire is a terrible thing! We are inclined to become apathetic about matters that we seldom

Your fire fighters work hard to prevent fires. That is the modern way of fighting them. We have had great success. We ask your support in the future as in the past. The cooperation of residents has been remark-

Our genial Assastant Chief George Norris took his usual stand during the building of the city float. He claims that he takes a great part in the construction-but Chief Heasley thinks the stand George takes is sitting down.

Both George and Frank Spencer are on the job early and can be seen there late. They declare that it is important that some one look after things. Chief Heasley appeared there occasionally to see that these two were looked after. Jimmie Tyler, another fire fighter, drove the float in the

Building Permits for Year Well Over Million Dollars

City Building Inspector William Lees last week put the lid on a big building year in Sierra Madre—a year that saw Mrs. Jung Sierra Madie—a year \$1,275,055,50 in building per-legisted at the city hall. Passes Away

The figure was \$547,233.50 larger than the total building permits taken out during 1949. \$727.832. Mr. Lees said the total for last month also was higher than for December of a year ago Permits amounting to \$153,600 were issued last month.

compared with \$110,286 for December of 1949.

Mr. Lees said permits for more than \$500 were issued to: George W. Groth, to alter a dwelling and garage at 147 N. Baldwin, a permit for \$1000; M. F. Osti, to erect a steel warehouse at 290 W. Sierra Madre boulevard, permit for \$2,-000; Anne Lewis, to erect a house at 125 N. Sunnyside, permit for \$12,000. Frederick Thiele, to build a house and garage at 730 W. Alegria, \$8000; Mr. and Mrs. L. Lachter, to build a house at 431 N. Sunnyside, \$16,000; Doris Suman, to build a house on Cypress Court, Mrs. Eugene Caukin, to alter

dwelling at 642 Woodland Drive, \$1000; R. S. McKesson, to alter a house at 254 N. Baldwin. \$1200: E. P. Lombardi, to build a house at 601 Ramona. \$8000. Walter E. Zaiss, to build a house and garage a 414 W. Ramona, \$8000; Harold Spears, to build a house and garage at 490 E. Grandview, \$8000; Ralph M. Jones, to erect a house and garage at 205 E. Orange Grove, \$24,000; Mrs. A. Bowman, to alter a dwelling at 323 N. Mountain Trail, \$4500; Rhodes and Lange, two permits for \$9000 each to build a house and garage at 11 E. Bonita and 11 E. Orange Grove.

ALL AMERICAN SCREWBALL -George Niesen, well-known Broadway star, brings nine acts of gala vaudeville entertainment to Mission Playhouse Tuesday night in San Gabriel. The show which brings back comedy, songs and music of the "good old days" will play for a week's run.

your reall pharmacist protects you

when he says...

"I'm sorry, but that requires a prescription"

Science has uncovered many drugs and narcotics that are usefulduring illness in assisting nature to restore normalcy to your body and mind. BUT, the misuse of many of them can bring anguish, pain and, in extreme cases, serious consequences. It is for this reason drugs

such as barbiturates (sleeping tab-

lets) require a doctor's prescription. It is for YOUR PROTECTION that your Rexall Pharmacist insists upon proper direction for use by qualified physicians. Valuable to medical practice, but dangerous when improperly administered are such drugs and chemicals as benzedrine, penicillin, thyroid extracts, dexedrine, some hormone products, the sulfonamides and the newer discoveries such as aureomycin. If you need them, your doctor will prescribe them and your Rexall Pharmacist will be happy to

Therefore, please do not feel offended when you hear him say, "Sorry but that requires a prescription." He is carrying out the letter of the laws under which he operates and is conscious of the oath he took when he began his career in pharmacy.

=(:Hartmans) , The Rexall Pharmacy

CUster 5-3311

POLICE BLOTTER

Three youths (and only 13years- of-age is young) apprehended for allegedly stealing three or four cars. When "captured." the car in which they w ere found was loaded to the gills with store materials such as clothes, cigars and so on. A

She reported that she left \$57.00 beneath the mattress of the bed she occupied the night before. She had a "fallin' out" with the landlady and asked for police escort to regain the mazoola. Results unknown to this department. Police Blot-

The Burglar was at it again. Forced open a screen and pushed in a window.

Arcadia police ask the local boys to investigate a disturbance across the street from Sierra Madre. The boys oblige until the arrival of the neighbor coppers. Just another instance of the value of threeway radio.

Illegal parking in the same place that has become a habit. Message delivered. Local boy hurt in an auto accident near tually.

La Verne. Dog bite. Another dog bite. A resident had reason to call the fire department when he arrived home and found his house full of smoke. The motor of his refrigerator got hot. A correct fuse was the only thing that prevented the motor from getting hot enough to cause a blaze. NEVER use a fuse that is not proper for the occasion. And NEVER place a penny beneath a fuse. The man is to be greatly congratulated for his adherence to the rules.

A traffic accident. Family trouble. Drinking too much has became a habit. Sought advice of the law.

When she tried to close the door of the car, while moving, Mrs. Rosa Curran of 3775 Mayfair, Pasadena fell, from the car and suffered injury. This occurred at Montecito and Mt.

A small boy is injured when struck by a car at the intersection of Baldwin and Highland. At this writing the boy is reported as coming along very well. He had fractures of the shoulder and hand.

DOG BITE. There has been a number of dog bites this week. Those who own dogs are warned that it is a violation to permit the dogs to run at large. Many reach the pound and those that do not WILL even-
